Agenda, Notes Thanks to SISC & Mike Jones

Notes: Derek

Agenda: a Digest / TAG issues & how cases, MIPv6.

15th / Eric Yen / IAPG and PMA: lots of attendance from AP very useful.
next meeting just before HEPvX

13th / Derek Simmel / TAG PMA:

global discussion → (global support may actually continue ...)

Jim B's thoughts on this may be changing :)

new member introductions are down → less F2F meetings.

IQTF → white paper on 'new world' → we need marketing

(IAPG) - blog or news item on relation REFEDS, IQTF, GEARP, InCommon & e

- as an IAPG paper. (entity relationship diagram).

+ 1-pager on policy.

→ add 'RPs' that are RJ's that set requirements: attract more SP's / RJ's.

14th / Dave K. FIMvR: (see slides) extending to America's. (ABOUT REQUIREMENTS!)

two main outputs: - v2 of the white paper. good things & things that changed.

- Questionnaire.

move to RDA to broaden scope → set up parallel FIM-IQ

RDA seems slightly broad towards EU + America. Enjoy AP Lyon.

PEPDC → horizontal vs applications. not just XSEDE
